Technical Skills

Languages: TypeScript, JavaScript, C++, Python, Golang(basics)

Frontend: React, Next.js, Astro, React Native, Expo, Reanimated, Tailwind, Nativewind, Motion, Zustand, TanStack Query

Backend: Express, NestJS, REST APIs, Zod, Go Fiber

AI/ML: LLM APIs, RAG pipelines, LangChain, Langgraph, DeepAgents, MCP, Prompt Engineering

Database/Tools: Supabase, Neon Postgres, Prisma, Drizzle, Vector DBs (Chroma, Pinecone, pgvector), Docker, Git Vercel

Experience

React Native Developer

Feb 2025 - August 2025

Droppins

Remote

- Developed 30+ cross platform screens using React Native, ensuring 100% pixel-perfect to the Figma design.
- Architected a Redux Toolkit store spanning 7 feature slices (products, categories, promotions, restaurants) with persisted state via redux-persist and AsyncStorage, eliminating redundant refetches across app relaunches.
- Integrated 3 third-party SDKs — Firebase Auth, Firebase App Check, and Google Maps — into a single Expo Router-based navigation flow spanning 4 route groups (auth, tabs, screens, index).

Projects

Kolkata Parking | *Next.js, Typescript, Tailwind, Supabase, Prisma*

[link ↗](#)

- Built a mobile-first, crowd-sourced parking discovery platform for Kolkata using Next.js, TypeScript, and Leaflet.js, enabling users to browse real-time parking availability on an interactive map.
- Designed a PostgreSQL schema with Prisma to support crowd-sourced status reporting (Available/Full/Not Sure), community-submitted spot verification, and anonymized analytics tracking across 5+ event types.
- Implemented an admin verification workflow to moderate community-submitted parking spots, filtering unverified listings before they surface on the live map.
- Engineered a color-coded, filterable map interface supporting vehicle-type and pricing filters, with a photo-upload pipeline architected for Cloudinary integration in production.

Tracki | *NestJS, Supabase, Prisma, Expo, React Native, NativeWind, Turborepo*

[link ↗](#)

- Architected a full-stack habit-tracking app as a pnpm/Turborepo monorepo with a NestJS, REST API, Expo (React Native) mobile app, and shared TypeScript constants package for type-safe contracts across both.
- Built a midnight cron job (nestjs/schedule) to automatically generate pending habit logs for all active, scheduled habits, alongside JWT-based authentication with protected route guards.

Sentinel | *Next.js, TypeScript, Tailwind CSS, React Flow*

[link ↗](#)

- Built the frontend for an AI governance dashboard that visualizes traffic between internal agents and LLM APIs (OpenAI, Anthropic) through a proxy layer enforcing policy and redaction rules.
- Designed an interactive React Flow topology map showing agent-to-API traffic color-coded by status (allowed, blocked, redacted/flagged), with a live threat feed and KPI cards for metrics like policy violations and proxy latency.
- Prototyped the full frontend against mock data to validate the dashboard UX before backend integration.

Education

Narula Institute of Technology

Kolkata, India

B.Tech in Computer Science and Engineering — Specialization in AI & ML

2023 – 2027

CGPA: 7.75

Achievements & Leadership

Entrepreneurship: Ideated Echomate, a multilingual voice sales agent, selected for a 3-month pre-incubation cohort under Made in JIS.

[link ↗](#)

Leadership: App Developer Lead at GDG NiT. Scaled the chapter from 0 to 2,500 members in 6 months, ran 15+ sessions (250+ attendees each), and partnered with Rise In and industry speakers to build a campus-wide developer culture.

[link ↗](#)

Hackathons: Participated in 15+ Hackathons/Ideathons. Winners of Made in JIS, finalist at JIS Idea Jam, Hack o' NiT, AI Utkarsh.
